

GENERATION OF GARBAGE: COLLECTION AND DISPOSAL

Daily average generation of Garbage in Nabadwip Municipality is estimated about 49.86 MT at present. The garbage is collected from the markets, houses, Cinema houses, Hospital, Nursing homes, Bus terminus, Hotels and restaurant. Then garbage of different wards is transported to the treatment ground for disposal. There are about 10 dust bin spreading in the wards. The existing Dumping ground is located in ward no-1 with an area of 9 acres and most part of the Dumping ground is filled to the optimum level. It is situated in 2 KM from the centre of the city at Malancha Para. A new dumping ground will be constructed very soon in the same area. Present position of vehicles for cleaning of garbage up to Dumping ground is as follows :

Tractor: 12 nos.
Rickshaw Trolley- 47nos

There are about 20 nos. of Community Toilet that have been constructed in different wards under Nabadwip Municipality. Our corporation Staff clears the entire above latrine. The charge for clearing public septic tanks by our Cess Pool.
