

## Water Supply System

The municipality has overhead reservoir for supplying water through pipe line and tube wells and hand pumps. There are 4 water reservoirs (capacity-10000, 30000, 35000, 40000) gallons which are all constructed by PHE and handed over to the Municipality. These reservoirs supply water to all wards in shifts. The supply of water to the reservoirs is done by 13 nos of pumps.

1	Ranir Ghat Pump House
2	Chari Chara Bazar Pump
3	Ganga Nagar Pump
4	Bouri Para pump house
5	Bus-Stand Pump house
6	Office pump house
7	Full Bagan Para pump
8	Mathapur Road pump motor
9	Fanshitala Chara pump
10	Prachin Mayapur pump motor
11	Muri Ghat pump Motor
12	Agameswari Para pump motor
13	Haritala pump house

The present supply of pipe water by the ULB is varied from 15 liters to 55 lpcd. But the ULB is desirous to reach the extent of 130 lpcd. The water quality is normal .There is urgent need of extension for water pipeline and installation of hand pumps and tube well. Water pipeline extension and more stand posts and tube wells in selected places are extremely needed by the citizen.
